

# Be a Hero. Help Save a Life. On and Off the Ice.

In a matter of seconds, the outcome of a hockey game can change dramatically. The same holds true for sudden cardiac arrest (SCA).

For those who can be saved, a swift response time with an AED can make the difference between life and death.

That's why you want to be sure your rink is equipped with a Defibtech Lifeline AED.

Survival rates decrease by 7-10% for every minute that passes without a shock. Defibrillation using an automated external defibrillator (AED) within three minutes can increase survival rates from less than 8 percent to more than 70 percent.

## Defibtech Lifeline AEDs

- » Unprecedented ease-of-use
- » Robust and durable
- » Easy maintenance
- » Ready for rescue
- » Full-color video instruction
- » Award-winning ergonomic design

**DEFIBTECH LIFELINE VIEW™** The only AED with a full-color video display that shows step-by-step videos for saving a life. Users simply follow the extensive voice prompts and automated instructions.

**defibtech**  
Life-Saving Technology Within Reach
